FINANCIAL AND CONSUMER LITERACY

COMMODITY MAPS

As a class, developworking definition of the term "agricultural commodity." Provide students with a map of New York State and a list of New York's agricultural commodities. Assign small groups of students to one of the growing regions in the state. Groups research theinsegrid place the appropriate commodities in their region on the map. Groups present their maps to the class and point out the features of the region that support the commodities produced there. Discuss how a community's economy is related to the contributor its region's agricultural commodities.

HEALTH, SAFETY, AND WELLNESS

FARMTO-SCHOOL MENUS

Students work in small groups to develop school lunch menus for-FoxSochool Week, featuring local agricultural products. Students present their mideas to the school cafeteria manager and work to include their menus into the school lunch offerings.

PROBLEM SOLVING AND INNOVATION

WINDMILL PROJECT

Students research the use of wind energy in agriculture, both historically and in the present. Small groups design and build windmills using everyday supplies, such as wooden sticks, wooden spoons, bendable wire, string, paperclips, rubber bands, toothpicks, aluminum foil, tape, dowels, glue, paper, cardboard, and plastic wrap. Students test their windmills blow dryers or fans, evaluate their results, and present reflections to the class. Discuss how coexisting wind farms and agricultural farms might benefit a community.

SUSTAINABILITY

SUSTAINING AN ORGANIZATION

Students research the background and **elep**ment of career and technical student leadership organizations, including FFA. Students create timelines showing milestones in the organizations' histories. Invite high school FFA leaders and alumni to class to share their experiences in the organization. Ask guests to focus some comments on the organization's plans to stay relevant and active in the future. Following the presentation, students add future milestones to their timelines.
